Description :

Prsentation de l'diteurTech and investment trends in smart cities, drones, 3D printing, artificial intelligence, driverless cars, Internet of Things and other innovations that used to be sci-fi just a few years ago.Your Neighborhood Will Never Be the SameBy 2030 nearly 70% of the worlds population will be residents of a city. That means 3 billion more people will be living in cities in the next 30 years. Our generation is destined to witness an incredible number of new cities and new buildings built to host our new neighbours. Once

these cities are built, they wont be built again. And they wont be changed easily either. As in the tale of Alice in Wonderland, to get the right answers, you first have to find the right questions. I dont have all the answersnobody doesbut Ive collected many interesting tools along the road. These tools may help you and me to understand current and future trends in tech and culture. Its a small competitive advantage, but in the coming days it may be essential.Enjoy the insights and the interviews. If you dont agree, feel free to contact me. I welcome any challenge. This isnt a one-way conversation, after all. This is a global game. STEFANO

L. TRESCA
Table of Contents- Welcome- Would You Like to Share Your Story?- How To Get 12 Free Chapters- The Secret Life of an Uber Driver- Guo Bai- Simon Menashy (MMC Ventures)- The Future Is a Megacity- Minerva Tantoco (New York City CTO)- Milos Milisavljevic (Strawberry Energy)- One Drone in Every Home- Thomas Davies (Seedrs)- Adeo Ressi (Founder Institute)- 3D Printing.
